

Day 1

25.05.2026

Today was Pfingstmontag and i enjoyed the day in the sun

Day 2

26.05.2026

On Tuesday Jakob and I had our first talk with Yann about our final Project. Later on we split our parts.

The first thing I made was the background. The Idea was that we wanted to have a moving background which displays different kind of text.

```
let texts = ["BÄÄH BÄHH BÄÄH", "MÄÄH MÄHH MÄÄÄ", "BLÖÖÖK", "I AM A SHEEEEEEP"]
let bgString = texts [0];
let dynamicLines = 40;
let textColor;
let textScale = 75;

function setup() {
  createCanvas(windowWidth, windowHeight);
  frameRate(8);
  textColor = color(255);
}

function draw() {
  background(5);

  textSize(windowWidth / textScale);
  textFont("monospace");
  textAlign(LEFT, TOP);

  let completeLineText = bgString.repeat(
    floor(25 * sin(frameCount * 0.05) + 45)
  );

  for (let i = 0; i < dynamicLines; i++) {
    let b = map(i, 0, dynamicLines, 1, 0.2);

    fill(
      red(textColor) * b,
      green(textColor) * b,
      blue(textColor) * b
    );

    text(
      completeLineText,
      -100 + (i % 2 === 0 ? 1 : -1) * ((frameCount * 4) % 150),
      i * (windowHeight / dynamicLines)
    );
  }
}
```

```

    );
  }
}

function mousePressed() {
  textColor = color(random(255), random(255), random(255));
  textScale = random(200);
  bgString = random(texts);
}

function windowResized() {
  resizeCanvas(windowwidth, windowHeight);
}

```

[illegible]

With the help of Jakob and some help online I managed to create an Interactive Background which changes color and text and size with a mouseclick.

Day 3

27.05.2026

On Wednesday I started to create the Audio for our performance on Strudel. After I watched some Tutorials online I got my inspiration and began to cook.

Strudel experiments

1.

```
setCps(140/60/4)

$: s("sbd!4")._scope()
.duck("2:3:4:10:20:30").duckattack(0.2).duckdepth(0.9)
$bass: n(irand(20).sub(7).seg(16)).scale("c:minor")
.s("sawtooth").lpf(200).lpenv(slider(0,0,8)).lpq(12).orbit(2)

$: s("supersaw").detune(1).rel(5).beat(2, 32).slow(2).orbit(2)
.fm("4").fmh(2.04)

_$. ("pulse").orbit(4).seg(16).dec(.1).fm(time).fmh(time)

$: s("hh*8")
.struct("1 0 1 1 0 1 0 1")
.speed(irand(4).add(1))
.room(.5)
.size(.5)
.gain(2)

$: note("c2 eb2 g2 bb2")
.s("supersaw")
.slow(8)
.attack(4)
.release(6)
.lpf(sine.range(200,1200))
.room(.8)
.size(.9)
.gain(1)
```

In this part I found some Tutorials and began Implementing different parts.

2.

```
setCps(140/60/4)

_$. s("sbd!4")._scope()
.duck("2:3:4:10:20:30").duckattack(0.2).duckdepth(0.9)
_$.bass: n(irand(20).sub(7).seg(16)).scale("c:minor")
.s("sawtooth").lpf(200).lpenv(slider(4.752,0,8)).lpq(12).orbit(2)

_$. s("supersaw").detune(1).rel(5).beat(2, 32).slow(2).orbit(2)
.fm("4").fmh(2.04)

_$. ("pulse").orbit(4).seg(16).dec(.1).fm(time).fmh(time)

_$. s("hh*8")
```

```

.struct("1 0 1 1 0 1 0 1")
.speed(irand(3).add(1))
.room(.5)
.size(.5)
.gain(2)

_$. s("oh*4")
.struct("0 1 0 1")
.hpf(4000)
.dec(.12)
.room(.4)
.gain(1)

_$. n("0 ~ 2 ~")
.scale("g:minor")
.s("sawtooth")
.fm(sine.range(1,6).slow(2))
.fmh(2)
.lpf(sine.range(300,1800).slow(4))
.attack(.08)
.release(.9)
.dec(.8)
.shape(.15)
.gain(.8)
.room(.4)

```

Kept adding new stuff...

3.

```

setCps(140/60/4)

// Snare
_$. s("sd")
.struct("0 0 1 0 0 0 1 0")
.gain(0.9)

// Melodie
_$. note("c4 eb4 g4 bb4")
.s("supersaw")
.slow(4)
.rel(2)
.lpf(1500)
.room(0.5)
.size(0.8)
.gain(0.25)

// Hi-Hats 1
_$. s("hh*8")
.struct("1 0 1 1 0 1 0 1")
.speed(irand(3).add(1))
.room(.5)

```

```

.size(.5)
.gain(2)

// Hi-Hats 2
_$. s("hh*16")
.gain("0.5 0.3 0.4 0.3")
.dec(0.04)

_$. s("oh*4")
.struct("0 1 0 1")
.hpf(4000)
.dec(.12)
.room(.4)
.gain(1)

_$. s("pulse").orbit(4).seg(16).dec(.1).fm(time).fmh(time).gain(1)

//BELLS
$: n("0").s("sheep_bell").gain(0.3)

//BLÖÖÖÖKEN
$: n("0").s("strudel_sounds")

_$. s("sbd!4")._scope().gain(1.5)

.duckorbit("2:3:4:10:20:30").duckattack(0.2).duckdepth(0.9)
_$bass: n(irand(1,4,6,8,10,20).sub(7).seg(16)).scale("c:minor")
.s("sawtooth").lpf(200).lpenv(slider(4.976,0,8)).lpq(12).orbit(2)

_$. s("supersaw").detune(1).rel(5).beat(2, 32).slow(2).orbit(2)
.fm("4").fmh(2.04).gain(0.7)

_$. n("0 ~ 2 ~")
.scale("g:minor")
.s("sawtooth")
.fm(sine.range(1,6).slow(2))
.fmh(2)
.lpf(sine.range(300,1800).slow(4))
.attack(.08)
.release(.9)
.dec(.8)
.shape(.15)
.gain(.8)
.room(.4)

```

Until I finally arranged the different parts and even integrated the sound-samples of sheep.

Day 4

28.05.2026

On Thursday I worked on the gras snippet. Again with the help of Jakob I managed to create a cool gras animation for the sheep.

```
let bladeCount = 75;
let grassHeight = 120;

function setup() {
  createCanvas(windowWidth, windowHeight);
}

function draw() {

  background('black');

  noStroke();
  fill('green');

  let bladewidth = width / bladeCount;

  for (let i = 0; i < bladeCount; i++) {

    let leftBaseX = i * bladewidth;
    let rightBaseX = (i + 1) * bladewidth;

    let tipX = leftBaseX + (bladewidth * 0.5) + sin(frameCount * 0.02 + i) * 15;

    // let growth = (frameCount * 0.5) % grassHeight;
    let growth = map(
      sin(frameCount * 0.02),
      -1,
      1,
      0,
      grassHeight
    );

    let currentHeight = growth + cos(i * 0.5) * 40;

    let tipY = height - currentHeight;

    triangle(leftBaseX, height, rightBaseX, height, tipX, tipY);
  }
}
```

Day 5

29.05.2026

On friday and sunday i finished all my snippets for the presentation on Monday 01.06.2026
